

Says

What have we heard them say?  
What can we magine them saying?

Think

What are their wants, needs, hopes  
and dreams? What other thought  
might influence their behavior

Does

What behavior have we observed?  
What can we imagine them doing?

Feel

What are their fears, frustrations, and  
anxieties? What other feelings might  
influence their behavior

Early kidney disease  
may not have any  
symptoms, so  
getting tested may  
be the only way to  
know your kidney  
are healthy.

CKD refers to  
the loss of  
kidney  
function over  
time.

there is no cure  
for kidney failure  
,but it is possible  
to live long life  
with treatment.

Usually, when  
the creatinine  
clearance fall to  
10-12 cc/minutes,  
the patient  
needs dialysis.

cut down your  
intake of highly  
processed  
foods,which are  
loaded with sugar  
and sodium.

yes. people are  
allowed to stop  
or not start their  
treatment,if  
they wish.

without your  
dialysis treatment,  
toxic wastes and  
fluid will build up in  
your body, making  
you feel more tired.

In stage 1  
CKD, the  
damage to  
your kidney is  
mild .

While its not  
possible to  
reverse kidney  
damage,you can  
take step to slow  
it down.

The dialysis  
treatment  
itself is  
painless.

The average dialysis  
price in Hyderabad  
depends upon a  
plethora of factors  
and it may range  
anywhere from  
\$2500 to \$6000.

Many patients  
lead long, active,  
and fulfilling lives  
for 5,10,20 or  
more years.

no.even when  
very well done ,  
dialysis only  
replace part of  
your kidney  
function.
